

High-Speed, Integrated Cap Lugging and Compound Pouring Line

Seamlessly dovetails between press and oven. Proven electro-mechanical technology with advanced electronic control overlay. Pneumatic transport conveys ferrous or aluminum caps with equal effectiveness.

From Apex Tool Works, Inc., a world-leader in container-end tooling, machinery and systems.

1
Stainless pneumatic conveyor:
High-speed; food grade stainless steel; accommodates compact footprint.

2
Apex-Swangren RLS:
High-speed, smooth, continuous rotary lugforming; 800 cpm for most sizes; worm-infeed; vacuum-capable for non-ferrous caps.

4
Apex-Swangren RCS:
High-speed, smooth, continuous rotary compound pouring; 800 cpm for most sizes; electronic chuck speed and fine dispense adjustments; electronic cap presence; vacuum-capable.

3
Touch-screen PLC control:
Intuitive with sharp, clear graphics; easy set-up and monitoring.
